Air System Protector

BENEFITS OF THE AIR SYSTEM PROTECTOR TECHNOLOGY

Air System Protector is a step forward from the standard cartridge, capable not only of drying air but also of separating oil and fine aerosols. The WABCO Air System Protector is a smart, efficient coalescing cartridge providing excellent oil separation while keeping its drying capacity at peak levels.

WABCO Air System Protector combines robust protection against oilingress with excellent drying performance. Even towards the end of its recommended life, a WABCO Air System Protector cartridge provides superior drying performance.
