

TIRE PREMIUM SEAL

For commercial vehicles

- Simpler, quicker and safer
- Reduces downtime on the road
- Latex-free technology
- Environmentally friendly
- Can use tire for up to 1000kms
- No replacement tire needed

WABCO

The innovative and indispensable first-aid kit for

Approved by major vehicle manufacturers

The sealant is acknowledged, tested and approved by major vehicle manufacturers and has safety certifications from industry bodies including Technischer Überwachungs-Verein (TÜV) and DEKRA.

The valve extractor set lets you easily remove valves from single or dual tires without having to remove the wheel.

Tedious tire changes are now a thing of the past with WABCO Tire Premium Seal. Avoid tire changes next to busy highways and being dangerously exposed to passing vehicles. Avoid obstructing traffic and reduce the time you take to fix a tire when it's late, snowing or raining. Time is money when schedules are planned and you must deliver to the customer on time.

WABCO Tire Premium Seal can reduce the risk of accidents by reduction of downtime on the highway. WABCO presents a product which enables you to repair a damaged tire quickly, easily and reliably to get you back on the road fast.

Stay Safe

Since spending more time on the open road only adds danger, WABCO Tire Premium Seal helps make the repair process **simpler, quicker and safer** – you now have fast reliable tire sealing with minimum downtime.

Enhance Tire Life

WABCO Tire Premium Seal is based on **latex-free technology** and uses micro-fibre particles with outstanding sealing properties and great power reserves. The tires are not physically altered in this non-destructive process.

Puncture holes (i.e. due to bolts or nails) up to a diameter of ten millimeter can be reliably sealed and the tire reused. The tire can later be repaired, in consultation with a tire workshop, and even re-treaded to conform to regional standards and requirements.

For your leaking tire

Using the truck's compressor, pump in the sealant through the valve extractor which also prevents venting.

Seal the leak in around ten minutes and you are good to go!

Use the kit's manometer and 10 meter long hose to periodically monitor tire pressure.

Save Money

After properly sealing the leaking tire with WABCO Tire Premium Seal, it **can be driven on for nearly 1000kms** or for up to 14 days. You do not need to wait for a breakdown service or buy a new tire. **Permanent tire repair is possible**, and no need to purchase a new tire thereby prolonging tire use. No need to carry spare wheels, unless required by applicable laws, reducing vehicle weight by up to **300kg**, **cutting costs** and **increasing payload**.

Be Quick

The valve extractors in the WABCO Tire Premium Seal kit are specially designed to let you remove a valve quickly and easily, fill the tire with WABCO Tire Premium Seal through the valve stem and refit the valve. There is then an airtight connection between the tire and the WABCO Tire Premium Seal Container, preventing any leakage.

WABCO Tire Premium Seal enables you to repair your tire quickly and safely. You can drive with the tire immediately at speeds of up to 80km/h depending on local regulations. WABCO Tire Premium Seal complements the WABCO Integrated Vehicle Tire Pressure Monitoring system (IVTM). IVTM can recognize a significant air pressure change when there is a leak in the tire before there is any tire damage.

Keep it Clean

Environmentally friendly, WABCO Tire Premium Seal uses water soluble micro-fibre particles that wash away easily with water for safe disposal and no risk of environmental damage. When it's time to repair the leaking tire permanently, it can be wiped away with a cloth, the residue can then be washed off with water and disposed into sewage in accordance with regional environmental regulations.

Set of two valve extractors

WABCO Vehicle Control Systems, is one of the world's leading providers of electronic braking, stability, suspension and transmission control systems for heavy duty commercial vehicles. WABCO products are also increasingly used in luxury cars and sport utility vehicles (SUVs). Customers include the world's leading commercial truck, trailer, bus and passenger car manufacturers. Founded in the U.S. in 1869 as Westinghouse Air Brake Company, WABCO was acquired

by American Standard in 1968 and spun off in 2007. Headquartered in Brussels, Belgium, the business today employs more than 7,000 people in 34 offices and production facilities worldwide. In 2006, total sales were \$2 billion. WABCO is a publicly traded company and is listed on the New York Stock Exchange with the stock symbol WBC.
