Wouldn't it be of great added value to have immediate and precise information on all WABCO components fitted on trailers, buses, trucks or light vehicles?

**WABCO System Diagnostics** is vital software that gives you direct access to the Electronic Control Unit and to quickly identify any problems that occur. Everything about this software is set up for your convenience and to meet your specific needs. With this tool, vague complaints and poor information are a thing of the past.

# WABCO

*Making a diagnosis is a specialist's job. When vague complaints don't point to a specific condition, it takes a medical specialist to operate the X-ray machine, perform a full body scan and interpret the results correctly. With **WABCO System Diagnostics** you can look into all the ECUs and identify the problem quickly. **With WABCO, you become the specialist.***

“ A truck entered the workshop with a defective braking system. We installed a new EBS, but to enter the specific and extensive parameters in the new modulator, the ordinary multi brand diagnostic software lacks functionalities. Then you have two options: send the vehicle to the manufacturer's workshop, or do it yourself with WABCO System Diagnostics. ”

## Benefits to facilitate your job

- ✓ **Easy** access to 40 different WABCO components
- ✓ **Fast** diagnostics
