

FUNCTION MODULE (FCF) FILES FOR TRAILER EBS E

This Document is for information only. The usage of the linked FCF file is done under own risk. WABCO is not taking responsibility for the correct function and the cooperation with later updates then specified

Terms of use

The usage of the FCF requires PIN1 training for the specified TEBS variant and a detailed understanding of all functions of the vehicle. Never use the FCF if there a considerable implication on the safety of the vehicle.

By downloading of the file you release WABCO from all responsibility.

After installation, a detailed test of all trailer EBS functions must be performed.

Name of FCF	SmartBoard Push Button
Vehicle Application	All trailers equipped with SmartBoard
Functional description	With this module a push button is created at the SmartBoard. As long as the button is pushed (during ignition is on), a GIO is switched to supply voltage.
Interfaces	Any available GIO
Required TEBS E variant	Standard / Premium / Multi-Voltage
Known implications or interferences	none
