

FIRMWARE FOR ELECTRONIC EXTENSION MODULE

This document is for information only. The usage of the linked file is done under own risk. WABCO is not taking responsibility for the correct function and the cooperation with later updates then specified

Term of use

The usage of the firmware requires Trailer EBS Diagnostic Software, TEBS E, a TEBS E PIN1 training and a detailed understanding of all functions of the vehicle. Never use the firmware if there is a considerable implication on the safety of the vehicle.

By downloading of the firmware you release WABCO from all responsibilities.

After installation, a detailed test of all desired functions must be performed.
