

Further exchange units / price adjustments

As an environmentally responsible company, our aim is to take products back and re-introduce them as exchange units. Even where direct recycling is not possible, valuable raw materials can still be recovered more effectively when the old unit is managed through us.

Your benefit from our efforts are very competitive prices for the exchange units, which can be identified by the last digit of the part number being a '7' (instead of '0') and by the red type plate.

Trailer EBS E modulators in exchange

The new exchange units include many devices for trailers. The TEBS E modulators are especially attractive. If you exchange an old modulator, you benefit from new functions such as OptiTurn™, OptiLoad™ and the Immobilizer. As with other exchange units, we will require that you return your old unit to us. When retrofitting, the returned unit may also be the replaced ABS system of the vehicle.

Price adjustments

In the table below you will find exchange units which have recently been added to the range, as well as products where the price needed to be adjusted due to drastic changes of the cost base.

The prices provided are valid from 1 July 2010.

Gross Prices for products - range extension

Product	Material Description	GP 2010 (EUR)	GP 2010 (GBP)
971 002 913 7	Park Release Emergency Valve	310.00	276.00
