

1500th WABCO Service Workshop Partner welcomed

During the first quarter of 2010 WABCO celebrated another important milestone. The continued focus that WABCO has in improving the service workshop network is highlighted by the addition of our 1,500th partner – Turkish WABCO Service Center “Ertürk”.

Nizar Ayyad, Regional Leader for Middle East and Africa (MEA) said: “We are really proud of this workshop; M. Ertürk opened his first facility in 1985 and then moved to a new location next to Ankara highway. This is a strategic place, while the facility is bigger and offers a better level of service, it was the right time to re-new the partnership and certify them WABCO Service Center.

Welcome to this new member!

Focussing on the performance and service capabilities of the workshop partners, WABCO is rapidly growing its global market presence, particularly outside Western Europe. WABCO service partners are certified using the commercial vehicle industry’s most stringent criteria, which calls for training of personnel, use of WABCO diagnostic software and hardware equipment and professional workshop practices. As a result of the criteria we have in place, WABCO Service Center’s offer industry leading services in diagnostics, maintenance and repair over a vehicle’s lifetime while also providing the complete warranty assessment on WABCO’s behalf.

To find the details of your nearest WABCO Service Workshop please visit the WABCO Advanced Location Finder at:
