

Improved range for air springs and new catalogue

We would like to inform you of a final replacement in our air spring range, which now makes the WABCO product range complete.

To ensure that we continued to provide you with the best products for your requirements, we replaced 21 part numbers in 2009 and informed you accordingly.

The table below shows the air springs that have been replaced, as well as the relevant reference numbers. The new WABCO part numbers thus replace the previous variant on a one-for-one basis.

Overview of changed air springs, July 2010				
Previous WABCO part number	New WABCO part number	Contitech	Goodyear	Vehicle manufacturer
896 130 156 4*	896 130 195 4	701 N	9006	Bova, Ikarus

Catalogue "Air springs for Commercial Vehicles" is now available

The structure of our catalogue has been further improved:

- Clearer list of replacements, sorted by brands
- More detailed list of applications, sorted by brand, vehicle type and reference numbers
- Number of complete unit and bellows number listed for each WABCO variant

To view the new catalogue, go to www.wabco-auto.com and open it via the online product catalogue INFORM (index word: air springs). You can also obtain a printed version of this catalogue. Talk to your WABCO contact for further details.
