## Market Information

WABCO presents the new disc brake

PAN 19-1 **plus**

Even great products can be improved. For instance, our PAN 19-1 has been upgraded after years of sterling service on trailer axles. The result is the PAN 19-1 plus which has been supplied from series production of March this year:

- plus** Very light 19.5" brake (only 32 kg!) with single-ram technology
- plus** Wheel sizes from 19.5" to 22.5", single or twin tyres, As well as Super Single
- plus** For drawbar trailers and semitrailers, rigid and steering axles up to 9 t
- plus** Good fading properties
- plus** High efficiency
- plus** Maintenance-free
- plus** Simple pad change
- plus** Pad wear indicators (optional).

Despite the various improvements, the PAN 19-1 plus is only very slightly larger. As a result, the PAN 19-1 and PAN 19-1 plus are interchangeable without any problems. The TÜV comparison report even permits the two types to be used on the same axle.

Even most of the spare parts can be used for both versions as required, And the complete brake can be obtained as a replacement unit. See overleaf for the list of all spare parts and part numbers.

This Market Information also includes information about **retrofitting wear indicators**.
