Change in quantity unit for hoses and tubes

With Market Information 24/2001, we inform you about our plan to change the quantity unit for hoses and tubes generally into parts. This measure is required due to a harmonised European procedure.

However, the change did not take place on the announced date, 01.09.2001.

We will make the change from **26 February 2002**. Thus **from 04.03.2002**, open orders will be handled and delivered with the quantity unit "part".

To make sure that the changeover is as smooth as possible, we will co-ordinate your open orders with you.

When you place orders after the above-mentioned date, please make sure to use the new quantity units.

Prices will be adjusted accordingly. In the Price List 2002 as in the price data carriers, the gross prices are only indicated on the basis of "parts" or "roll".

In the transition period (from 01.01.2002) to the changeover, gross prices were corrected in metre values, if necessary, so that correct invoicing is guaranteed up to the changeover takes place.

So that you know which articles are effected by the changeover and at the same time you get an overview of the actual sales program, corresponding tables are annexed.

These show all important data per article such as "dimension", "roll length", and "replacement". When you view the tables, you will note that some very well-known and familiar article numbers have been replaced.

We had to do this for organisational reasons. The replaced article numbers are underlined in gray in the tables.

We ask you to place the new article numbers into your EDP systems and to identify the replaced articles accordingly.

We thank you for your understanding.
