

WABCO presents the new disc brakes PAN 22-1

After the great success of the PAN 19-1plus the approved single-ram technology is now also available in 22,5" size. The PAN 22-1 is now in series production since the beginning of this year and has the following advantages for our customers:

- Very light 22,5" brake (only 36 kg pads linings) by the compact design of the patent single-ram technology
- The improved friction surface with the enlarged pad thickness by 2 mm gives a longer service life of about 10%
- For drawbar trailers and semi-trailers, rigid and steering axles up to 11 t
- High efficiency and good fading properties
- Maintenance-free
- Simple pad change
- Pad wear indicators (optional)

The repair kit for the guide pin is identical to that

of the PAN 19-1plus.

The complete brake can be obtained as a replacement unit. See overleaf for the list of all spare parts and part numbers.

A Market Information on the subject **retrofitting wear indicators** will follow shortly.

Spare parts PAN 22-1

mounted in SAF axles

left brake = SAF part number 3.080.0051.00

right brake = SAF part number 3.080.0050.00
