

ABS Solenoid Valve with Adapter Cable in a Set

As announced some times ago, WABCO in future will distribute ABS solenoid valves no longer with Kostal connector but with DIN bayonet.

The change-over of vehicles in the market will take some time. New trailer are fitted solely with devices and cables having DIN bayonets.

When replacing failed ABS solenoid valves, we recommend to replace cables aswell. Alternatively you need an additional adapter cable which can be ordered under 894 601 132 2 from your WABCO partner.

For an intervening period, we offer two devices for the aftermarket together with the adapter cable in a set:

472 195 004 0 / 7 replaced by **472 195 921 2** (472 195 018 0 + 894 601 132 2)

472 195 008 0 / 7 replaced by **472 195 920 2** (472 195 016 0 + 894 601 132 2)
