

Odometer as Set 446 303 920 2 also for Trailer EBS D

The odometer known from VCS, VCS II and VARIO C can also be employed for trailer EBS modulators of the new generation now.

The odometer was technically released for the trailer EBS-D (480 102 010 0 / 014 0 and 015 0 from KW 44/02). All tests were concluded with positive result.

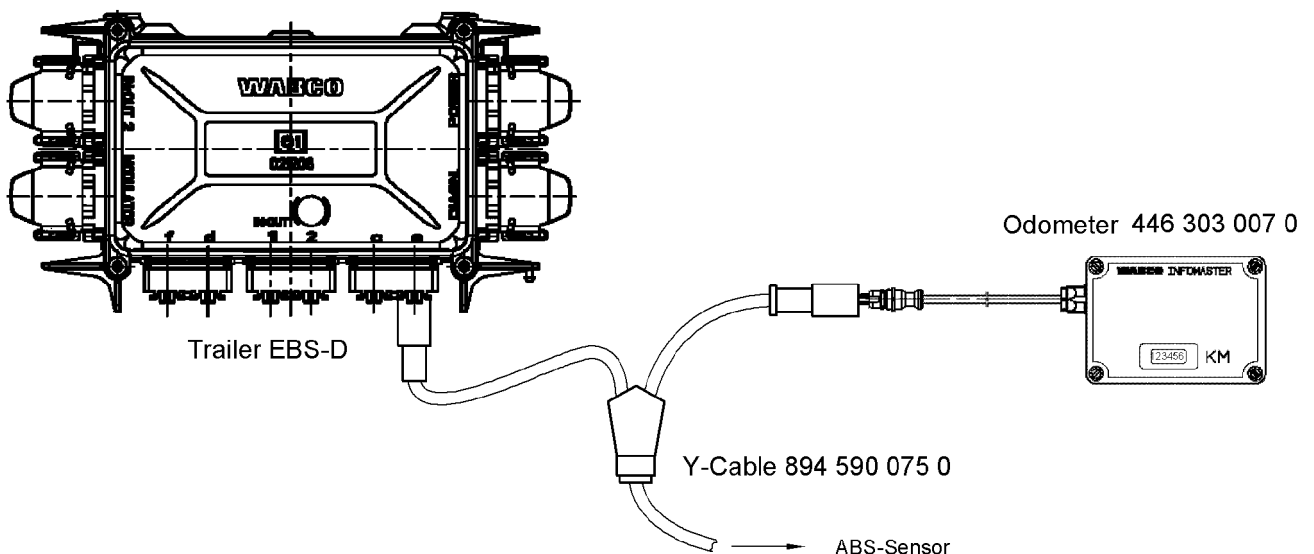

Function description:

The mileage covered is determined independently from the towing vehicle's power supply through own voltage supply (lithium battery, operating life approx. 10 years) and is indicated on a display. The kilometer reading is easily retrievable outside on the vehicle even when it is decoupled.

That is why the odometer is particularly recommended e.g. for forwarding agencies and leasing companies.

The mileage information is branched off from the main axle ABS sensor and can be adjusted to the various tire sizes by one-time setting.

The tire size 385/65 R 22.5 is factory-set at a pole wheel having 100 teeth. Using the set's product number 446 303 920 2, INFORM (www-wabco-auto.com) will furnish you with adjustment instructions for other tire sizes and magnet wheels.
