

WABCO EXpert Diagnostics

You already know us as a supplier of diagnostic programs for a large number of complex vehicle systems, a clear range of cables and adapters are available and the subscription system for downloading diagnostic software is established. A WABCO complete offer with computer, software, adapter set and trolley for mobile use now extends your diagnostic possibilities.

A diagnostic tool for most electronic systems, already configured for immediate use on a computer suitable for use in workshops, and its fittings and features adapted to your needs – with WABCO EXpert Diagnostics makes this reality.

Complete vehicle diagnostics from a single source

The extensive features of course also includes the whole range of the WABCO diagnostic subscription. In addition, programs are available for diagnosing further systems, such as:

- Engine control
- Airbags
- Transmission control
- Climate control
- Service interval reset
- ... and much much more.

The programs are updated as usual via the WABCO software download.

The workshop computer

Use in workshops requires robust units. The WABCO EXpert Diagnostics Computer is placed on a sturdy trolley, which also contains all the necessary connection cables and diagnostic interfaces. The computer has an open operating system, so that it can also be used for other workshop and office applications.

Immediately ready for use

WABCO EXpert Diagnostics is a complete solution. The operating system and all programs are installed and preconfigured ready for immediate use. You save time and stress!

During the initial startup you can call upon support from an experienced WABCO employee.

During a system training course you will receive the knowledge and authorisation to adjust system functions. In addition, in future we will be offering special diagnostics training courses. Contact us!
