

WABCO Disc Brake Cylinder for Motor Vehicles and Buses

WABCO Tristop®- and Diaphragm cylinder are applied to vehicles of all leading vehicle manufacturers. Caused by model change and technical improvement the different versions seem almost unmanageable. In the following table we composed an up-to-date overview of the most popular cylinders for you. The table is sorted by the vehicle manufacturers part number in ascending order.

The mentioned WABCO product might be the younger replacement of an older part number, in many cases already equipped with IBV. With this Integrated Breather Valve the outside breather tube is unnecessary; thus the cylinder is easier to adapt.

WABCO numbers marked with * have a VOSS-plug connection system 232 with stepped hole instead of the VOSS-plug connection system 230. For replacing an old cylinder one of the following adapters is required:

- 893 220 921 2 VOSS 230 screw-in kit M 22x1.5
- 893 226 683 2 VOSS 232 screw-type coupling M 22x1.5

Please also refer to our Market Information 4012 from April 2004.
