

Training Online: WABCO launches E-Learning

Further training for workshop staff is an important requirement if a company is to progress in the future. Whoever fails to keep pace will learn that new systems are more complex, so failure to be trained can lead to repairs taking too long, which in turn can lead to customers being dissatisfied.

However, we understand if an employee is away on a course this can represent a burden for the company. In an ideal world training courses would be short and employees would be available to work at peak times if necessary, as well as completing the training required. Ein Wunschtraum?

No travel or hotel

With immediate effect WABCO are pleased to offer you training online to combat these problems, this will save you travel time & expenses. By participating in a course you will not be tied to a schedule or have to work through all the training modules in one go. You determine your own time and the pace of your training. Start your training, interrupt it and start again as you please - even weeks later. You can choose to skip familiar topics or repeat entire modules. Tests in each chapter help you to check the success of your learning process. WABCO E-Learning makes all this possible.

Learning with the computer

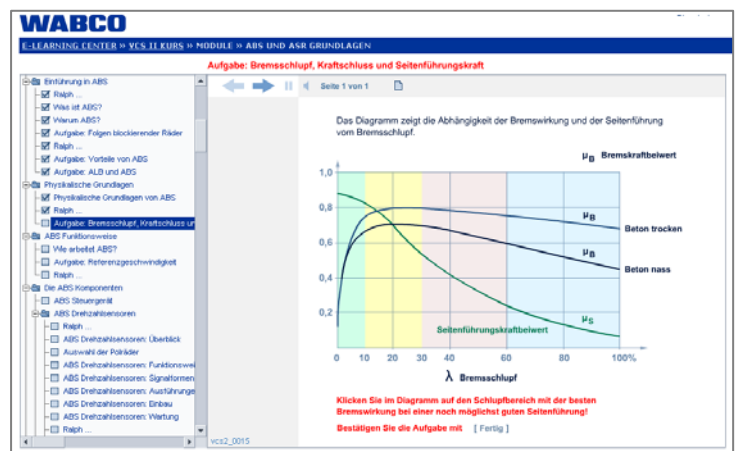

WABCO E-Learning is available via the Internet. It is abbreviated to WBT: **Web Based Training**. You will therefore need a computer with Internet access to proceed with WBT training.

Register at the E-Learning Centre under <http://wbt.wabco.info>. Here you can start a demo version of the course or book a course by credit card. Alternatively you can also purchase the course using the retail system.

Interactive elements

WABCO E-Learning makes use of all the benefits associated with computer-aided learning: you are guided through the course step by step. The subject matter is well presented, well structured and easily accessed using simple navigations. Technical functions are explained in many realistic animations for all to understand.

The WBT process is designed to keep you both interested & have you actively involved. This is possible as you will be asked to assign virtual components, click correct solutions and many other interactive elements are incorporated into the system so that you learn faster.

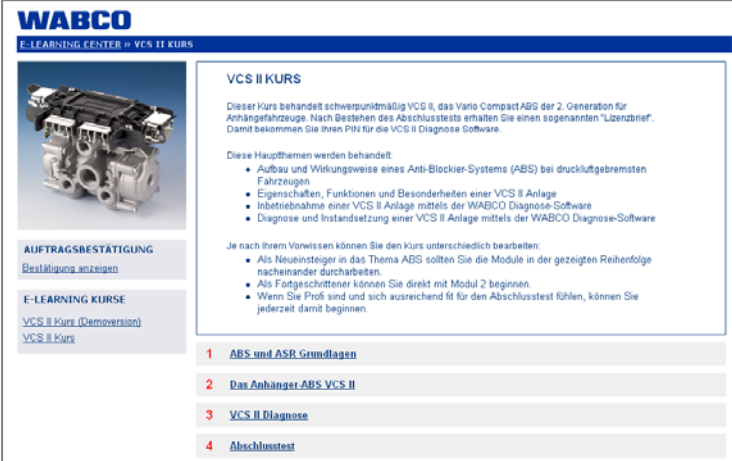

On completion you receive a PIN number

WABCO E-Learning is designed to supplement, not replace, traditional training in the WABCO training network. It is nevertheless a fully-fledged training programme which gives you access to a PIN for the appropriate Diagnostic Software, this is after you have passed the training courses final test. After completing the course you will receive the same licence letter that would be awarded after attending conventional training to use to access your PIN at the WABCO Internet-based PIN application site.

Start with VCS II

Our first E-Learning course will provide knowledge with regard to the WABCO ABS VCS II system for trailers. Depending on your previous knowledge you will need between 3 to 8 hours for this course. The final test can be taken again if you do not pass first time round.

We will gradually expand our E-Learning range. Further courses on the subjects such as ECAS calibration and IVTM, as well as other language versions will be added in the course of this year.

WABCO
E-LEARNING CENTER - VCS II KURS

VCS II KURS

Dieser Kurs behandelt schwerpunktmäßig VCS II, das Vario Compact ABS der 2. Generation für Anhängerfahrzeuge. Nach Bestehen des Abschlusstests erhalten Sie einen sogenannten "Lizenzbrief". Damit bekommen Sie Ihren PIN für die VCS II Diagnose Software.

Diese Hauptthemen werden behandelt:

- Aufbau und Wirkungsweise eines Anti-Blockier-Systems (ABS) bei druckluftgebremsen Fahrzeugen
- Eigenschaften, Funktionen und Besonderheiten einer VCS II Anlage
- Inbetriebnahme einer VCS II Anlage mittels der WABCO Diagnose-Software
- Diagnose und Instandsetzung einer VCS II Anlage mittels der WABCO Diagnose-Software

Je nach Ihrem Vorwissen können Sie den Kurs unterschiedlich bearbeiten:

- Als Neueinsteiger in das Thema ABS sollten Sie die Module in der gezeigten Reihenfolge nacheinander durcharbeiten.
- Als Fortgeschrittener können Sie direkt mit Modul 2 beginnen.
- Wenn Sie Profi sind und sich ausreichend fit für den Abschlusstest fühlen, können Sie jederzeit damit beginnen.
