

EBS Trailer Control Valve 480 204 001 0 / 002 0**480 204 001 0****480 204 002 0****Replacement:**

The EBS trailer control valve 480 204 001 0 will be replaced by EBS trailer control valve 480 204 002 0

Difference:

Beside of the position of the electrical connector, the replacement is compatible to the predecessor 480 204 001 0. The plug will no longer be connected in horizontal but in vertical direction. Due to this, the pneumatical port 11 was shifted towards port 43.

Advantages:

EBS trailer control valve 480 204 002 0 has a higher protection against dirt at the contacts and due to an optimized characteristic a better release behaviour of the trailer's parking brake.

As a result of this change-over, the gross price will be adapted. The new valve 480 204 002 0 is from now on available with the same gross price like 480 204 001 0.
