

Fitting Case 893 000 200 0

Have you not also known a situation where a valve needed replacing on a commercial vehicle, but the required couplings were not available?

Frequently one is forced to interrupt work in such a case and to obtain the required couplings either by driving to the vendor or by waiting on a delivery. Longer waiting times are then involved, which the customer often refuses to accept.

To save you experiencing such a situation as far as possible, we offer you a Fitting Case with an assortment of 26 different couplings which are often required when repairing or replacing compressed air equipment.

For example, this is how you can prepare a new trailer brake valve or levelling valve for replacement: new couplings for receiving the plastic piping are clamped into the vice prior to installation. After the device has been installed in the vehicle, the neatly cut old pipes are simply pushed in to the new couplings. Provided the pipes have been marked prior to removing from the device to avoid mistaking one for the other, the repair or replacement should be completed easily without swapping the connectors.

You can also use parts contained in the Fitting Case to adapt different pipe sizes or to replace leaking couplings.

A clearly structured list of contents with illustrations is attached on the inside of the case to facilitate re-ordering the used parts. Removable partitions permit adding additional items as required. This can be useful if you regularly require more units of a particular coupling type than the corresponding compartment can accommodate.

This Fitting Case is designed for repair requirements and so represents a good kit or supplement for workshops and service vehicles.

Of course the Fitting Case only contains top quality couplings that have been approved for brake and compressed-air systems in commercial vehicles.

The following overview provides a detailed description of the case's contents. You will find further information on couplings under the keyword "Couplings" in our product catalogue INFORM on the Internet at www.wabco-auto.com.

Overview of contents of the Fitting Case

No.	Product number	Name	Data
4	893 129 191 2	Straight Nose Nozzle	Plug-in P5 / M 12x1.5
6	893 129 192 2	Straight Nose Nozzle	Plug-in P5 / M 16x1.5
4	893 129 193 2	Straight Nose Nozzle	Plug-in P5 / M 22x1.5
4	893 401 797 4	45° Elbow	Plug-in P5 / M 16x1.5
4	893 401 015 2	90° Elbow	Plug-in P5 / M 16x1.5
4	893 501 194 4	L-Union	Plug-in P5 / M 16x1.5
4	893 501 196 4	T-Union	Plug-in P5 / M 16x1.5
2	893 401 818 4	F-Union	Plug-in P5 / M 16x1.5
4	893 803 023 0	Straight threaded plug-and-socket connector	∅ 6x1.0 / M 16x1.5
8	893 803 950 0	Straight threaded plug-and-socket connector	∅ 8x1.0 / M 12x1.5
6	893 803 960 0	Straight threaded plug-and-socket connector	∅ 8x1.0 / M 16x1.5
6	893 803 880 0	Straight threaded plug-and-socket connector	∅ 10x1.0 / M 16x1.5
6	893 803 890 0	Straight threaded plug-and-socket connector	∅ 10x1.0 / M 22x1.5
6	893 803 006 0	Straight threaded plug-and-socket connector	∅ 12x1.5 / M 16x1.5
6	893 803 007 0	Straight threaded plug-and-socket connector	∅ 12x1.5 / M 22x1.5
4	893 803 013 0	Straight threaded plug-and-socket connector	∅ 18x2.0 / M 22x1.5
4	893 803 971 0	Straight threaded plug-and-socket connector	∅ 15x1.5 / M 22x1.5
4	893 803 012 0	Straight threaded plug-and-socket connector	∅ 16x2.0 / M 22x1.5
8	893 104 064 4	Female/ Female Stud	M 16x1.5
4	893 022 000 2	screw plug	M 12x1.5
4	893 022 014 4	screw plug	M 16x1.5
4	893 022 015 4	screw plug	M 22x1.5
4	463 703 120 0	Test Connection	M 16x1.5
4	463 703 115 0	Test Connection	M 22x1.5
3	893 104 297 2	Bulkhead with preassembled Lock nut	M 22x1.5 / M 16x1.5 / M 16x1.5
3	893 104 296 2	Bulkhead with preassembled Lock nut	M 22x1.5 / M 16x1.5 / M 22x1.5
