

End of production of the VARIO C and VCS I systems

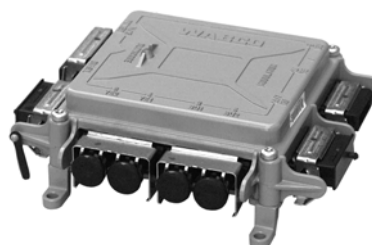

Production of the above-mentioned ABS systems for trailers will finish at the end of the year.

Currently there are small quantities of these components available.
The order no. is:

VARIO C

446 105 031 0
446 105 051 0

VCS I

446 108 031 0
446 108 035 0

We will continue to supply these products as long as stocks last.

If a replacement is required, the new ABS generation VCS-II will be used from 1 January 2007. Design differences make the VCS II system incompatible with previous systems. For this reason, WABCO will offer various retrofit sets, including matching adapter cables.

Retrofitting is uncomplicated due to the simple structure of the VCS II system.
We will inform you about retrofit concepts in coming market information releases.
