

New WABCO Diagnostic Cable

We offer a selection of new and/or diagnostic cables that are not included in the basic package, to ensure that your workshop is well equipped for future diagnostic work.

Safeguard the diagnostic options of all vehicles and select the following cables to complete your range.

Of course we also offer – as an enhancement to the software subscription – our two accessory cases, which are ideal for all beginners and also for all other subscribers or users of individual diagnostic programs.

Both accessory cases contain a selection of commonly used diagnostic cables for workshops that carry out professional WABCO PC diagnoses. Depending upon your workshops requirements you can choose the most appropriate accessory case. If you already own the individual components, you may also order the case without the contents.

On the following page is an overview of the respective case contents. The cables listed in the table above are not included in either of the cases and must be ordered separately.
