

New CAN diagnostic cable for extra long vehicles

WABCO are now offering - in addition to the 5 metre CAN diagnostic cable - a 20 metre long version so that especially long vehicles can also be diagnosed easily.

This cable is connected with the CAN adapter 446 300 360 0 on the ABS/EBS socket on the front of the towing vehicle.

The length of the cable keeps your diagnostic computer on-site for the entire diagnosis or commissioning procedure.

Please order the diagnostic cable from your WABCO partner by stating the respective number.

Order Number	Length	Comment
446 300 361 0	5 m	For diagnosis of VCSII and TEBS E.
446 300 362 0	20 m	Only in combination with the diagnostics interface with USB interface 446 301 022 0.
