

ODR-Tracker – Trip recorder evaluation for the trailer

The ODR (Operating Data Recorder) Tracker is a separate PC program for the analysis of trailers fitted with the Trailer EBS System.

This independent program is based on the positive experience of the Trailer Service Online (TSO) and permits evaluation directly at the vehicle.

The benefit to you as a carrier

- Handling of the vehicle :Reduce operating costs incurred by mis-use.
- Vehicle utilisation: Increase profitability and economic efficiency.
- Service scheduling: Improve coordination of service intervals.

The benefit to you as a leasing company

- Vehicle load: Evaluation of loads the vehicle is subjected to by the customer.
- Vehicle overloading: Detect trips with overloads.
- Service scheduling: Improve coordination of service intervals.

The benefit to you as a workshop

- Monitoring: Extend your service.
- Detailed information: Make use of in-depth diagnostic options.

The benefit to you as a vehicle manufacturer

- Use: Monitor the running and wear characteristics and adjust the construction accordingly.
- Warranty claims: Use the ODR-Tracker for a fair evaluation.

Every vehicle that is equipped with a trailer EBS of the D generation (as of production week 01/2004) or the new E generation has this integrated operating data recorder.

The ODR-Tracker can run on any commercially available Windows PC with USB port. The software is only available on a USB flash drive and can be obtained under the WABCO order number 446 301 536 0 (user language in German) or 446 301 692 0 (user language in English). The PC connects the vehicle to the WABCO Diagnose Software via a WABCO diagnostic interface.

You will find the operating instructions for the ODR-Tracker at our website www.wabco-auto.com by entering the document number in INFORM (815 010 149 3 for the English, 815 020 149 3 for the German version).

If you are interested in, or have questions regarding, the ODR-Tracker, please contact your WABCO partner.
