

New design for ECAS control box

During 2008 a new control box will be made available for Trailer ECAS. The existing control box is replaced by a new design similar to that of the SmartBoard.

The new colour design is now more appealing, and the pushbuttons are now also in colour, this makes the control box easier to operate in twilight or dark conditions.

Function, fitting dimensions, and cable connections remain identical, which ensures that the old units can be replaced without complications.

An overview of control box functions is provided in the table below:

Product number					
new	446 156 020 0	446 156 021 0	446 156 022 0	446 156 023 0	
replaced	446 156 000 0	446 156 010 0	446 156 011 0	446 156 012 0	
System	Function				Connecting cable
TEBS E		Lifting / Lowering	Lifting / Lowering lifting axle function		449 627 060 0
ECAS		Lifting / Lowering	Lifting / Lowering lifting axle function	Lifting / Lowering for drawbar trailers	449 637 050 0
