

## SmartBoard for ADR vehicles

WABCO have developed a new version SmartBoard that allows trailers that carry dangerous goods to take advantage of SmartBoard functions.

The new SmartBoard suitable for ADR vehicles is now available under the product number **446 192 111 0**.

The SmartBoard is just as simple to operate as the standard version however functions are restricted due to the operation without a battery:

- No date and time function is available, For this reason it is not possible to store message.
- The odometer reading of the Trailer EBS is displayed, the internal odometer is without function.
- Information is displayed when the trailer is supplied with power.

The fitting dimensions and cable connections are unchanged.

The SmartBoard is installed in compliance with the approval certificate TUEH - TB 2007 - 132.00. You will find the certificate on the Internet at [www.wabco-auto.com](http://www.wabco-auto.com) in the product catalogue INFORM by entering the product number or the index words "SmartBoard" or "certificate".
