

New WABCO Presentation Software

WABCO have developed three new versions of the interactive presentation and simulation programs for use at WABCO training events:

- Conventional pneumatic brake system with ABS
- Electronically controlled braking system (EBS)
- Electronically controlled air suspension system (ECAS)

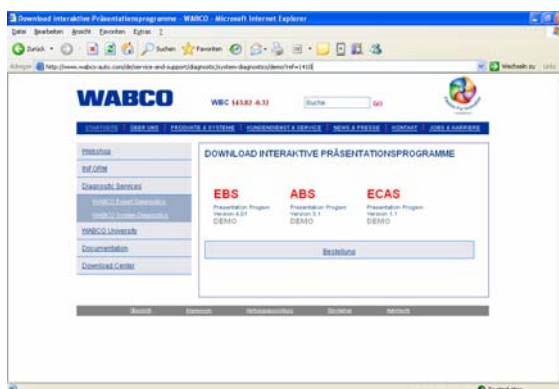

These programs have been used with success for WABCO trainings for a long time and help to convey knowledge relating to commercial vehicles by utilising up to date multimedia techniques.

The EBS program has been extended to include new content regarding EBS E.

The new programs are compatible with the latest versions of the Internet Explorer and the Flash Player and can be run under Windows Vista.

A demo version of these new programs can be downloaded at:

http://www.wabco-auto.com/service_and_support/diagnosis/system-diagnostics/demo-versions

The price for the new programs is the same as for the previous versions at € 950 plus VAT.

The prices for program updates from the old to the new version are listed in the table below. Please speak to your WABCO partner about this new offer!

Program version	Update price (plus VAT)
ABS 3.0 to 3.1	50 EUR
EBS 3.0 to 4.01	450 EUR
ECAS 1.0 to 1.1	50 EUR
