

New WABCO Diagnostics Case

Even if the Diagnostics Subscription enables you to diagnose all WABCO systems – It cannot be done without the suitable adapter between PC and vehicle.

Complementing the Diagnostic Software Trailer package, we have successfully offered a case which provides a suitable basic kit in this regard. It includes the Diagnostic Interface as well as the cables commonly used in trailers.

We now follow suit for the Diagnostic Software Bus package and the new Truck packages and have put together a basic kit for these systems clearly arranged in a case.

The table below lists the content of the individual cases. Speak to your WABCO partner about this offer!

WABCO Diagnostics Accessory Case
