

SmartBoard - New features and retrofitting options

The Smartboard is the trailer's instrument board. In conjunction with TEBS and other systems, it controls the brakes, air suspension, lifting axle, tyre control and other functional elements fitted by the vehicle manufacturer.

We recently told you about the new trailer EBS functions in version E1. [Click on this link to see the market information about this again.](#)

To be able to use these features on the vehicle, the SmartBoard supports software adaptation that has been included in manufactured equipment since calendar week 34/2008.

- Support for TEBS D, E and the new version E1
- Improved menu navigation
- More user languages: Greek, Portuguese, Swedish, Czech, Finnish
- New "screensaver" feature
- Battery charge indicator for IVTM wheel module version 2
- Maintenance during Diagnostic Software version 1.07.

To make this successful product even more attractive - even for retrofitting - we are offering complete SmartBoard and connection cable sets to suit the equipment in your vehicle. The part numbers for these are set out in the table below.

SmartBoard Part Numbers		
Description	Details	Part number
SmartBoard	Standard	446 192 110 0
SmartBoard	GGVS/ADR	446 192 111 0
TEBS D Set	Standard SmartBoard, Cable (8 m)	400 604 503 0
TEBS D Set	ADR SmartBoard, Cable (8 m)	400 604 831 0
TEBS E /E1 Set	Standard SmartBoard, Cable (6m)	400 604 504 0
TEBS E /E1 Set	ADR SmartBoard, Cable (6m)	400 604 832 0
