

Couplings for vehicle manufacturing and workshops

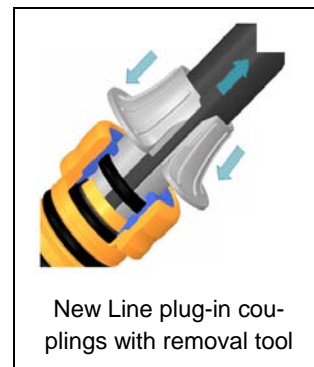

As a supplier of complete vehicle systems we can provide not only brakes and control units but also tubing and couplings from renowned manufacturers.

The benefit to you: You can purchase all system components from a single supplier and be sure that all accessory parts match your system and have passed our strict quality checks.

To complement the standard couplings from renowned manufacturers, we also offer push-fit couplings from Anoflex (P5) and Raufoss (Standard and New Line).

What sets the newly included New Line coupling system apart is that plastic pipe can be removed from the coupling without being damaged, so it can be reinserted again.

At the same time we have revised the entire product range and can now offer you any coupling required for commercial vehicles.

Our new [Couplings Catalogue](#) is clearly organised to provide easy access to the coupling you are looking for:

- Connections,
- Plug-in couplings,
- System couplings,
- Conventional couplings and
- Couplings for accessories.

Our Fitting Cases have proven to be a valuable asset for fast use in the workshop. The table below shows the contents of the cases and the Refill Kit.
