

More enhancements to the air spring range

We would like to inform you of additional replacements in our air spring range.

To ensure that we could continue to provide you with the best products for your requirements, in April we began the first stage of the process by replacing 7 air spring part numbers.

We are now pleased to be able to offer you the next six part numbers as the second stage in this process.

The new WABCO part numbers now replace the previous vehicle application on a one-for-one basis.

The table below shows the air springs that have been replaced, and the new part numbers now available with the relevant reference numbers:
