

Two piece clamp rings for air reservoirs

As a specialist in compressed air braking systems, WABCO offers you a comprehensive assortment of air reservoirs, clamp rings and draining valves.

In order to make fitting air reservoirs even simpler, we have added a premium segment to our existing clamp ring range.

Next to the existing one-piece clamp rings, we are now offering two-piece clamp rings for all conventional air reservoir sizes.

The benefit of using the two-piece clamp rings is:

Time savings due to simplified fitting process

- The fact that the strap and the console can be separated makes it easier and more flexible to fit the air reservoir.

Reduced storage costs

- The complete separation of the strap from the console, as shown in the diagram below, makes packing sizes very compact for storage purposes.

The table below shows our range of clamp rings to fit all standard sizes of air reservoir. All are of the familiar WABCO quality, with German Technical Inspection Agency (TÜV) approved safety guaranteed for the two part retaining straps. All clamp rings are protected against corrosion by means of cathodic immersion painting.

Overview of retaining straps 		
Diameter of reservoir	One-part type	Two-part type
Ø 206 mm	451 999 206 2	950 405 351 2
Ø 246 mm	451 999 246 2	950 515 351 2
Ø 276 mm	451 999 276 2	950 720 351 2
Ø 310 mm	451 999 310 2	950 949 351 2
Ø 396 mm	451 999 396 2	950 001 351 2
