

W.EASY replaces WABCO Expert Diagnostics

Workshops in the replacement market need to be able to serve a range of different customers. The real challenge lies in diagnosing and repairing systems and components from a wide range of vehicle and system manufacturers.

Since 2006, WABCO has been offering Expert Diagnostics, a tool which supports a range of systems. However, this tool is now being replaced by the new product W.EASY, developed by our WABCOWÜRTH joint venture.

For you as an Expert Diagnostics user, this means:

- WABCO will remain selling Expert Diagnostics until the end of March 2012. Until then, you can buy one last update which will allow you to operate the diagnostics system until 31/03/2013 at the latest.
- WABCO will not be issuing any further functional updates. Expert Diagnostics can only be used for vehicles which are listed in the current product description. Use on other systems will invalidate our warranty.
- Please ask your WABCO partner for special conditions to switch to the WABCOWÜRTH W.EASY diagnostics systems.

Of course, we will continue to offer tailored WABCO system diagnostics for WABCO systems. Read more here: <http://www.wabco-auto.com/sd>.

If you have any questions, please contact your WABCO partner or visit us at <http://www.wabco-auto.com/>.
