**WABCO launches TEBS D REMAN**

After 13 years of success of the 1<sup>st</sup> Trailer EBS Generation (TEBS D) WABCO will stop its OE production of the respective modulator as older technology components will no longer be available from **1<sup>st</sup> July 2012**. The functionality of the system can be fully replaced by TEBS E since 2007. However because of differences in cables and ports TEBS D is still required for Aftermarket replacements.

To satisfy our customers and ensure the availability of spare parts WABCO will start to supply a REMAN version of TEBS D modulators as from **1<sup>st</sup> August 2012** on.

**A dedicated label for a new product range**

In order to ensure a sustainable production despite the shortage of components, it will be crucial to have an efficient core return system.

For your understanding the WABCO Reman products are distinguished by a green type plate. The last character of the part number is an 'R'.  
For example: 480 102 014 R

The unit is packaged in a WABCO box marked with a green sticker.

As a result of the creation of these parts TEBS D red labels will no longer be available.

**In line with WABCO values**

With the launch of remanufactured electronic products WABCO reduces continuously environmental pollution. By purchasing our **Green Label Reman** products, which are similar to new WABCO products in terms of functionality and performance, you are supporting WABCO striving towards greater sustainability.

**Safety** is one of the key values at WABCO, therefore TEBS D REMAN offers the same **quality** and high performance levels as a new manufactured unit. This can only be achieved by carrying out the same extensive quality tests as during the production of the new OE product (e.g. climate tests, contact resistance tests etc). For this reason a warranty period of **24 months** is also offered on Green Label products.

The introduction of TEBS D REMAN is aligned with WABCO corporate strategy:

It is estimated that recycling generates 80% less CO<sub>2</sub> emissions than manufacturing of new.

TEBS D is the modulator unit in the trailer electronic braking system. This hi-tech unit can now be recycled and offered with similar performance level as a new unit.

## New core return process for Reman parts

### 1. Core return in single packaging

To prevent transportation damage, the dealer must return the used, mechanically undamaged core part (see picture below on the right) to WABCO in the original box (382 x 240 x 150mm; supplied by delivery). A dedicated return process has been developed in cooperation with UPS. To properly allocate returned devices, it is necessary to fill out the appropriate fields on the green sticker on the box (see right). The core return process is operated via the authorised WABCO supplier. An old core must be returned within one year (maximum) of the purchasing of the Reman unit.

### 2. Automatic core reimbursement

WABCO invoices the distributor for a reimbursement of £87 (plus VAT) for each TEBS D REMAN unit purchased. The value of this reimbursement is paid only after the old core is received. A reimbursement is only credited when the old core is returned in the original box with the green sticker. The correctly completed sticker is prerequisite for an easy and fast reimbursement process.

Detailed information of the core return process is available in the respective service information that you will receive from your local WABCO contact.

We do not accept parts damaged by misuse or during disassembly (stored mechanical damages in cover, ports or connectors).

## Overview of the available TEBS D REMAN units

TEBS D REMAN (Green label) replaces the current standard and premium version. With the introduction of TEBS D REMAN, the respective Red label units are no longer available. For example: 480 102 014 R replaces 480 102 010 7 and 480 102 014 7.

Please use the following table for more details:

Variant	Part number	Version	Type label	Comment
Original	480 102 010 0	Standard	black	cancelled - replaced by 480 102 014 0
	480 102 014 0	Premium		still available
Exchange Unit	480 102 010 7	Standard	red	cancelled - replaced by REMAN
	480 102 014 7	Premium		cancelled - replaced by REMAN
<b>REMAN</b>	<b>480 102 014 R</b>	<b>Premium</b>	<b>green</b>	<b>can be applied for 480 102 010 X and 480 102 014 X</b>
