

Audi A8 – Two new compressor aggregats for the Independent Aftermarket

Two new WABCO compressor variants for the air suspension of Audi A8 have been designed especially for the Independent Aftermarket (IAM) in order to sustain the market success of these products. Both new variants are technically identical to existing compressors of Original Equipment Suppliers (OES), the only difference being the integration of WABCO branding to ensure IAM customers remain independent.

The compressor is the heart and main component of an Air Supply Unit (ASU). Generally, original equipment suppliers offer the complete Air Supply Unit as a replacement in the event of a repair. WABCO provides an alternative and more economical repair solution to its customers: the compressor can be replaced separately without replacing the complete Air Supply Unit.

Car compressor aggregat for Audi A8

WABCO has been a recognised OE supplier of car compressors for over 30 years:

- Global market leader in air suspension compressors
- Used by virtually all major OEMs
- Over 3.5 million units installed
- Top quality, reliable and genuine parts
- Wide range of variants
