

WABCO REPAIR KITS NOW SUPPLIED IN WABCO ORIGINAL PACKAGING

From now on, WABCO's Repair Kits and Repair Units supplied within WABCO's Independent Aftermarket network will be delivered in the new, distinctive, uniquely secure and easily traceable WABCO original packaging.

WABCO's new state of the art packaging represents a huge advance in the storage, identification and traceability of WABCO parts. Whatever the size of the box, the packaging always features a security seal, uniquely coded product label and matching serial number.

The new packaging represents an additional step forwards in WABCO's commitment to strengthening the position of its Independent Aftermarket (IAM) network on the international distribution scene. Customers are able to check the authenticity of the high quality repair kits they have in their hands.

FEATURES OF WABCO ORIGINAL PACKAGING

- The **original packaging design** shows unique blue and green intersecting lines.
- The **security product label** affixed centrally on every single package is given a unique serial number, making it easy to see that you have a WABCO original in your hand. You can quickly and easily check the authenticity of the WABCO product online at www.wabco-auto.com/WABCOoriginal. And to make your inventory easier, the label includes the date of the packaging, product number, description and delivery note.
- The **security seal** ensures that the package is kept intact and free from unauthorised manipulation. Once opened, a broken seal is clear for all to see. It will say 'opened' in six languages and there is nothing anyone can do to reverse it. This means that you know if you are the first to open the box.
