

WABCO EXTENDS CORE RETURN SYSTEM

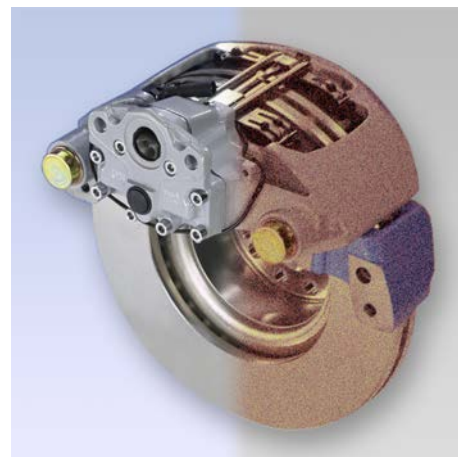

From July 1st, 2015, a wide range of PAN™ calipers will be invoiced with a surcharge that will be refunded upon return of the core.

SAFETY FIRST

WABCO's reverse logistic process protects customers from misusing or reconditioning broken, damaged or worn out parts presenting critical safety issues.

- If brake calipers are reused at the end of their life cycle they may present material fatigue leading to malfunctioning of the brake.
- WABCO's reverse logistic process aims to collect and inspect returned cores before they are re-manufactured to the highest quality standards and processes.

WABCO strongly advises not to re-use brake calipers remanufactured by non authorized third parties!

ENVIRONMENTAL PROTECTION

Returning calipers supports WABCO's contribution to a better environment as it ensures used products not suitable to be remanufactured are appropriately disposed.

WHICH CALIPERS ARE INCLUDED IN THE CORE RETURN PROCESS?

Product number	Brake type	EUR		CHF		GBP	
		Gross price 2015	Surcharge	Gross price 2015	Surcharge	Gross price 2015	Surcharge

HOW ARE USED PARTS RETURNED?

While buying a new PAN™ air disk brake caliper from WABCO, you are charged a deposit that can be refunded against exchange of your old caliper. This exchange needs to happen within a year after purchase of your new caliper. The year runs from the date stated on the WABCO invoice.

The core return system applies to WABCO direct customers who return products in surcharge program (GREEN FLOW) or exchange unit program (RED FLOW) – including cartridges.

The Core Return Guidelines are available as PDF file for download at the website [myWABCO](https://www.am.wabco-auto.com) (<https://www.am.wabco-auto.com>)

The return process is operated via authorised WABCO partners. Please contact your [WABCO partner](#) (www.wabco-auto.com/findwabco) whether you need to return cores or further information.
