

NEW LABELS AND NAMES FOR WABCO CHEMICAL PRODUCTS

Over the next few months you will see new labels on the WABCO chemical products range. These changes make WABCO products fully compliant with the new CLP regulation, which require European companies to classify and label substances and mixtures according to harmonised standards. The ultimate goal of the regulation is to protect human health and the environment while facilitating trade.

The composition of the products has not changed, nor have their part numbers. The changes are restricted to the label's design, pictures, and the risk/safety warnings.

WABCO CHEMICAL PRODUCTS

Weather, wear and tear will always represent a challenge in respect of the safety and efficiency of commercial vehicles. As a leading supplier of technical equipment and control systems for these vehicles, WABCO has a deep understanding of mechanical, mechatronic and electronic technologies for braking, stability and transmission automation systems. WABCO's maintenance products are specially design to service these technologies, extend the lifetime of the vehicle and improve reliability on the road.

A small investment in the right maintenance product can make a huge difference to the service life and long term maintenance costs of the vehicle.

WABCO chemical products with new labels

NEW NAME FOR WABCO LUBRICANTS AND GREASE

Having the right lubricant is critical to ensure the proper function and extend the lifetime of moving components. From now on, the range of greases and lubricants will be supplied under the umbrella name of **WABCO EaseTec™** followed by additional characters (e.g. P1) which indicate the specific lubricant type.

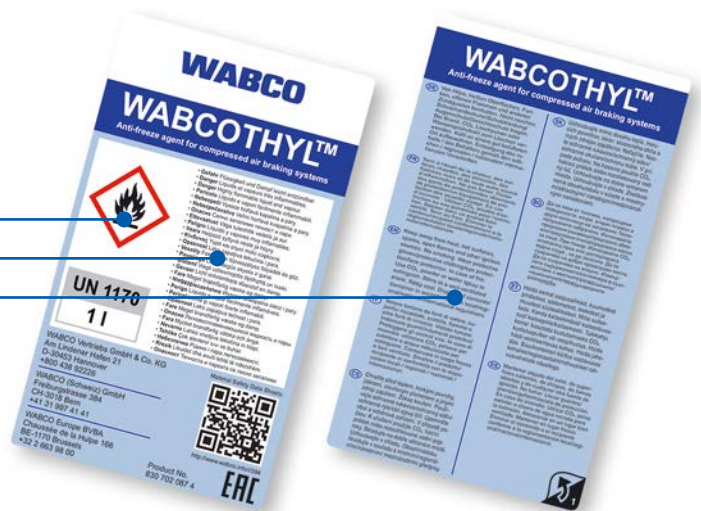

CHANGES ON PRODUCT LABELS

For all WABCO chemical products you will now see a new design which is fully compliant with recently introduced legal requirements. The new labels will include all required pictograms, risk warnings and safety information.

Example of new product label

- Harmonised pictograms
- Risk warnings
- Safety information

Example of a repair kit with a new label

Some repair kits containing lubricant packages are now required to display additional risk and safety information.

The boxes will now be supplied with additional labels.

- Harmonised pictograms
- Risk warnings
