

NEW VOLVO HAND BRAKE VALVES FOR THE AFTERMARKET

Two WABCO hand brake valve variants for Volvo vehicles have been redesigned and released for the Independent Aftermarket (IAM) for a continued market success of those products.

Both variants are technically identical to existing Original Equipment (OE) hand brake valves. The only difference is that their original branding is removed.

FUNCTION

These hand brake valves are 3/2 control valves operated via push-button. They are used as a safety valve in the parking brake control system of the truck.

In the event of a foot brake valve failure, the hand brake valve can be used additionally for emergency braking. The lever is then carefully actuated.
