

NEW VERSION OF THE WABCO INSPECTION APP

With the [WABCO Inspection App](#) fleet operators can carry out pre-trip inspections quickly and easily.

Commercial vehicle drivers are responsible for the operation and safety of the vehicle. As a result, it is a legal requirement to check the vehicle.

A pre-trip inspection can identify and document defects. The use of a checklist for this procedure incurs high costs for generating and managing the proof of inspection.

These costs can be significantly reduced if technical solutions are utilised to support such checks. With the WABCO Inspection App for Android devices, for instance, the driver can easily open, evaluate and save inspection items as well as receive them via email.

On the website [WABCO Inspection](https://inspection.wabco-auto.com) (<https://inspection.wabco-auto.com>), fleet managers can then evaluate the data quickly and organise required repairs in advance. This avoids vehicle downtimes – even accidents – facilitates maintenance and repair services and increases the operational readiness for customer transport orders.

BENEFITS

- The WABCO Inspection App includes templates for evaluating the test items and fleet managers can create their own inspection items. This is not restricted to technical checks. It is also possible to create an accident report, for example.
- The driver always has his test reports at hand and fleet managers are provided with an overview of all inspected vehicles and test results. Mobile phone photos supplement the documentation.
- This can save substantial sums of money as proof in insurance claims just as shorter test durations reduce costs.

AVAILABLE FREE OF CHARGE FROM THE GOOGLE PLAY STORE

The [WABCO Inspection App](#) is free of charge and available for installation in the Google Play store. (https://play.google.com/store/apps/details?id=com.wabco_auto.inspection)
