# What is TX-CONNECT?

TX-CONNECT is a web-based back office solution that manages and displays real-time information from trucks, drivers, trailers and business partners. It enables interaction with drivers and visualisation of their activities. TX-CONNECT also offers historical views and reporting. Integration with other software applications guarantees further processing of your fleet data.

# Why use TX-CONNECT?

TX-CONNECT is the centre of all fleet management activities. It guarantees real-time fleet information, from departure to arrival. Moreover, the platform can be easily integrated into other software and reporting tools.

-  Exception-based fleet management
-  Fleet data in one user-friendly interface
-  Communication hub
-  Strong reporting capabilities
-  Extensive personalisation

# How to use TX-CONNECT?

By integrating TX-CONNECT with vehicle peripherals and connecting it with other office software, the platform ensures a consistent management of all your trucks, drivers, trailers, cargo and orders.

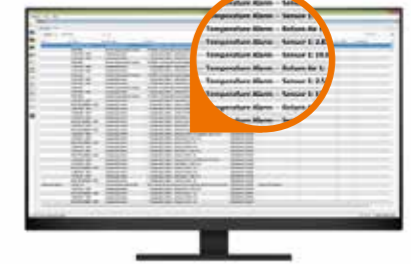

## TRACK & TRACE ON MAP

Real-time status & positions, traffic information, Points of Interest, GeoFencing, route management ...
