

Combine with the TX-SMART driver app

TX-SMART for TX-GO combines the TX-SMART driver app with the TX-GO on-board computer in one van or truck. TX-SMART is a driver app running on an Android device. Thanks to their specific characteristics, both devices capture different types of information that perfectly complement each other. TX-SMART supports driver communication and daily out-of-cabin activities; TX-GO is in charge of the transfer of corporate-secure vehicle (peripheral) data. Both info flows are smartly integrated into one TX-CONNECT back office view.

-  Driver app fit for ruggedised PDAs or smartphones
-  Communication between driver and home base
-  Support of out-of-cabin activities

What is TX-GO?

TX-GO is a truck-independent on-board computer without display designed for installation behind the dashboard. It is connected to the truck's digital tachograph, allowing real-time tacho activity follow-up, (automated) activity management and remote download of mass memory and driver cards. TX-GO is (optionally) connected to the CAN bus allowing fuel management, (trend) reporting and driver scoring. Integrated within the powerful TX-CONNECT back office platform, TX-GO is a secured gateway of fleet data and enables real-time fleet follow-up.

Why use TX-GO?

TX-GO is a perfect on-board computer for companies that want to do more than only pinpoint their trucks and reconstruct routes, yet do not really require personal interaction with their drivers.

- Low-entry OBC solution
- Easy installation, remote configuration and support
- Consistent and constant communication flow of company-critical data
- 24/7 use in industrial environments
- Integration with TX-CONNECT platform

How to use TX-GO?

The integration of TX-GO with TX-CONNECT results in value-adding back office capabilities: next to position, kilometre and real-time tacho activity status tracking, TX-GO enables remote mass memory and driver card download and permanent driving style monitoring.

POSITION UPDATES, GEOFENCING, HISTORICAL ROUTES

REAL-TIME TACHO ACTIVITY STATUS TRACKING

REAL-TIME VIEW ON DRIVING AND RESTING TIMES

REMOTE MASS MEMORY AND DRIVER CARD DOWNLOAD

FUEL CONSUMPTION REPORTS

DRIVING STYLE MONITORING
