

## Combine with the TX-FLEX driver app

TX-FLEX is a mobile add-on for the TX-SKY on-board computer. It is a driver app, running on an Android device. TX-FLEX facilitates all driver activities outside the truck cabin: barcode scanning, picture transfer, digital signatures and customer comments, pallet information and problem reporting. The data are synchronised via Bluetooth with the TX-SKY and sent to the TX-CONNECT back office platform for further processing.

-  Driver app fit for ruggedised PDAs or smartphones
-  On-board computer add-on
-  Support of out-of-cabin activities
-  Bluetooth and GPRS connection

# What is TX-SKY?

TX-SKY is a fixed mounted on-board computer with touch screen. It is fully integrated into our TX-CONNECT back office software and standard connected to the vehicle's CAN bus and tachograph. TX-SKY registers all driver and truck information as well as the data from other sources, such as temperature sensors and document scanners. As a secured gateway, TX-SKY enables the driver and dispatcher to exchange information in real time.

**RELIABLE CO-PILOT**

**SECURED GATEWAY OF FLEET DATA**

**COMMUNICATION CHANNEL BETWEEN DRIVER AND HOME BASE**

# Why use TX-SKY?

TX-SKY sets the standard in telematics fleet hardware. Based on a high-performance platform, its tablet-style interface ensures the best possible user experience. This ease-of-use as well as its plug-and-play installation guarantee a low total cost of ownership.

-  Easy installation, remote configuration and support
-  Intuitive user interface
-  Powerful processor and extensive internal memory
-  Future-proof driver tool
-  Integration with TX-CONNECT platform

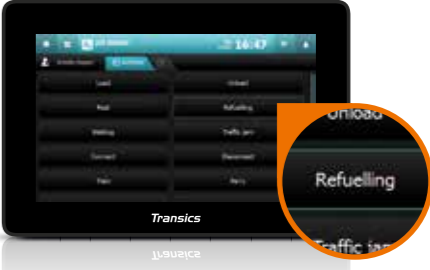

# How to use TX-SKY?

TX-SKY helps drivers perform their daily activities and reach their destination with ease and within time. The SKY technology minimises all administrative hassle, so that drivers can maximally focus on a safe and ecologically sound transport.
